SUMMARY

- Versatile Web Developer proficient in HTML5, CSS, JavaScript, and various programming languages.
- Hands-on experience developing interactive web applications and user-friendly interfaces. Flexible, creative, committed, enthusiasm.
- Skilled in integrating API's for real-time data presentation and delivering diverse project solutions.
- Committed to precision, problem-solving, and continuous learning in dynamic IT environments.

SKILLS

Languages: HTML5, CSS3, JavaScript, C++, Python, Java.

Frameworks: Bootstrap, Node.Js, Angular, React.

Other: Responsive design, Web development, Communication skills, Technical support fundamentals, Microsoft Office.

PROJECTS

TIC-TAC-TOE	Classic Two-Player Strategy Game - Click for GAME • Build interactive Tic-Tac-Toe web app using HTML5, CSS, JavaScript. • Implement user click handling, state tracking, winning condition checks. • Enable multiplayer or AI gameplay for engaging gaming experience.	Click for Github Link
NETFLIX CLONE	Netflix and chill - Click for WEBSITE • Create Netflix-like web interface for seamless movie TV browsing. • Develop user-friendly page mirroring Netflix interface for exploration. • Design engaging web page for users to browse diverse collection.	Click for Github Link
STOPWATCH	Time Management Application - Your Most Precious TIME • Build Stopwatch App: HTML5, CSS, JavaScript for structure, styling, functionality. • Functionality Implementation: Enable start, pause, reset, lap-tracking functionalities precisely. • Interactive UI Design: Craft interactive, user-friendly stopwatch application with accuracy.	Click for Github Link
CALCULATOR	Interactive Calculator Interface - Click for CALCULATE • Interactive Interface: Performs addition, subtraction, division, multiplication operations. • CSS Grid System: Aligns calculator buttons for seamless functionality, Integration of tools for a fully functional calculator app. • Additional Tools Required: EventListeners, if-else statements, operators, loops, Error Handling Validates user inputs, ensuring smooth calculator operation.	Click for Github Link
TO-DO-LIST	Task Management App - Click to ADD TASK Functionality Inclusions: Add, view, mark tasks complete, with separate lists. • Task Organization: Implement Pending & Completed Tasks sections for clarity, and Users can edit, delete tasks as needed. • Enhanced Features: Optionally, add date/time for task tracking, Error Handling Validates user inputs,	Click for Github Link
MEAL PLANNER	Utilizing Edamam API - MEAL Plan Generation: • User Input Form Creation: Form fields include meal count, diet preference, health specs. • Specification Options: Dropdowns for meal count, diet preference, health specifications, Input field for user's daily calorie intake included. • Meal Plan Display: Generates and exhibits meal plan in tabular format on webpage, Dark-themed CSS design, responsive layout, visually appealing interface.	Click for Github Link

EXPERIENCE

09/2023 10/2023	Web Developer Intern • Collaborated with the development team to troubleshoot issues, debug code, and implement solutions, demonstrating problem-solving skills in a fast-paced environment. • Developed responsive and user-friendly web applications using HTML, CSS and JavaScript, Documented project progress, including coding methodologies, challenges faced, and solutions implemented, different browsers and devices.
